About Us

OUR STORY

Built on Purpose and Passion

Founded in 2009, Shataya Global Building began with a single mission — to deliver construction projects that communities could be proud of. What started as a small contracting firm has grown into a regional leader with over 350 completed projects across Residential, Commercial, and Infrastructure sectors.

Our growth has been driven not by ambition alone, but by the trust of our clients, the dedication of our team, and an unwavering commitment to quality at every stage of every project. Today, Shataya Global Building employs over 500 professionals united by a shared passion for building what matters.

OUR CORE VALUES

01 Integrity & Transparency

Honest communication and ethical practices in every client engagement from start to finish.

02 Safety First Always

Industry-leading safety protocols that protect our teams, clients, and communities.

03 Innovation Driven

Modern construction techniques combined with deep craftsmanship and industry expertise.

04 Quality Guaranteed

Uncompromising standards delivered on time, within budget, every single time.

Our Services

WHAT WE DO

Comprehensive Construction Services

01 General Contracting

Full-scope project delivery with experienced teams and proven processes. We manage every aspect of your construction project from initial planning through to final handover.

02 Residential Construction

Custom homes and developments built with care, quality, and precision. From single-family homes to large residential developments, we deliver spaces people love.

03 Commercial Projects

Offices, retail, and mixed-use developments that perform and endure. We deliver high-performance spaces for businesses of all sizes with minimal disruption.

04 Renovation & Remodeling

Transforming existing spaces with minimal disruption and maximum impact. Our teams are experts at working within occupied or heritage buildings.

05 Project Management

Expert oversight ensuring on-time, on-budget delivery every time. Our project managers bring structure, clarity, and accountability to complex builds.

06 Engineering & Design

Integrated design and engineering services for complex structures. From structural analysis to MEP coordination, we handle every technical detail.
